

HPU 15 kW Mineral Oil

Selection	Value
ID Number	
Design Standard	DNV-2.7-3
Ex Sone	2
Frequency	50/60 Hz
Lifting certification	DNV273
Max Working pressure	345 bar
Max Gross weight	2000 kg
Max Effect	15 kw
Max Flow	69 l / min
Surgical fluid	
Pump Type	Parker PV046
Reservoir capacity	260 l
Voltage	440/690 V
Flow meter	Yes
Pressure filter	Yes
Pressure filter Element	Yes
Heat exchanger	Yes

We have a number of different Hydraulic Power Packs for rent, such as this one with Electric motor of 15kW. We have several of the same type available, or with similar specifications. In order to offer the most suitable product for your task, get in touch and we will be happy to help. Call us on +47 56 12 67 00 – ask for Change

Typical applications:

- HPU's (Hydraulic Power Unit) provide hydraulic power to actuate tools and valves and for the HOF.
- Hydraulic Pressure Unit can be used for continuous production
- IWOCS HPU – Installation Work Over Control System
- IRS HPU – Intervention Riser System, intervention operations
- Flushing Units, cleaning hydraulic lines
- Test HPU testing and other applications

What is system fluid?

System fluid means the fluid that is in the piping, piping system, cylinders or reservoir. System fluids may be mineral oils or petroleum-based hydraulic fluids, water or water-based fluids such as glycol, or on special occasions ethanol.

To better understand the operating principles and design features of a hydraulic power unit, it may be helpful to look at the different types available from our rental fleet.
