HOSE ASSEMBLY EQUIPMENT DESIGNED FOR THE TOUGHEST TASKS

We can offer a wide range of hose presses from reputable suppliers such as

Parker Parcrimp II is a vertical unit for assembling hoses, which is very easy to use

Finnpower P16, P20, and P32, are the machines that are most used as Allround.

Uniflex can supply hose presses for more extreme needs

Mobile devices can be either electrically powered, pneumatic or manually operated

From Parker, we offer the full range of hose presses, including training in use and assembly.

Finn-Power P20 and P32 are strong, fast and reliable crimping machines that cover a wide range.

These models "turn off" the hydraulics to save energy and to reduce the noise level in the workplace when the machine is idle. As an example, Finn-Power 20MS and 32MS are special models for demanding shrinkage applications in industrial repair shops on board a drilling platform

English

The innovative design of the Finn-Power 20MS and 32MS machines works easily in left- or right-hand operation, as feeding can take place either in front of or behind the machine.

We also supply qualified and certified personnel for hose assembly onshore and offshore

If you need equipment for mounting hydraulic hoses - Contact us.
