

Valve manifold and Valve rack

| Selection | Value |
|----------------------|----------------------|
| ID number | |
| Number of Lines | Customized |
| Max Working pressure | 4000 Bar |
| Surgical fluid Type | Most types of fluids |
| Type | Parker Autoclave |

Valve trees, manifolds and test manifolds

Pressure manifolds for use in testing and for transmitter set-up are manufactured and assembled quickly using Parker products.

Available with pressure class up to 4 000 Bar.

If you need a more comprehensive system, we design and produce quickly and efficiently, as we have most of the main components available in stock.
